Are you ready for **General English 2**?

These are the kinds of questions you could be working on:

- Choose a song to analyse. How are the language and structure shaped by the purpose, audience and contexts in which the song was created and received? Create a multimodal imaginative response equivalent to 750 – 1000 words that communicates a similar idea to the one in the song you studied.

- Write an analysis of this ad (400 - 500 words) which looks at the context, representation and values. Create a new ad that reimagines the old one in our modern context.

**ENGLISH 2**

*Size: 15 points*

*This is a new course that will be offered in 2017. It aligns with Senior Secondary Australian Curriculum English Units 1 and 2.*

English 2 is a foundation course which allows students to develop their skills in all aspects of oral, visual and written communication.

Through close study and wide reading, viewing and listening, students of this course will explore how meaning is communicated through the relationships between language, text, purpose, context and audience. They analyse the representation of ideas, attitudes and voices in texts to consider how texts represent the world and human experience.

**Pathways:** English 2 provides a pathway to English 3, English Literature 3 and English Writing 3.
