**COVID-19 SITE CLOSURE PLAN..... 1**

## Summary

This document has been prepared by Catholic Education Tasmania with contributions from Directors, WHS & Compliance in conjunction with the Departments of Education and Health, as well as Independent Schools Tasmania.

This document will broadly act as our system's COVID-19 Safety Plan and will need to be implemented by all schools. We are here to support you along this journey and encourage you to get in touch if any information isn't clear or covered in this document.

Brief overviews of each section have been provided below to help disseminate the right information to your staff and communities efficiently, and standalone copies of each section have been provided to assist.

Any updates to this document will be communicated to school leadership teams, with direction provided regarding any major changes to Public Health advice.

### Part A – Prevention of Infection

A two-part overview for requirements for Schools, the TCEO and Staff seeking to help prevent the transmission of COVID-19 in the school or work environment. Includes useful information on how to navigate situations where staff and students are displaying signs of illness, as well as direction on general requirements for students and adults in school environments.

### Part B – Case Management

Details regarding how staff, schools and our system more broadly will respond should a member of the school community tests positive with COVID-19. Advice re: engaging with Public Health, contact tracing, close-contact management and COVID leave can be found here.

### Part C – School Activities

Information regarding extra-curricular school activities including interstate travel, camps, sporting/social events. Reference is made to a number of Government Communications and Public Health Orders, including the Tasmanian Government's [A Framework for COVID-19 Safe Events and Activities in Tasmania](#).

### Part D – General

A general overview of the unfolding situation re: COVID for all CET/TCEO Staff. Includes references to the Safety Plan (this entire document), checking in, cleaning and hygiene, physical distancing, supporting vulnerable students and working from home.

### Appendices

Includes a number of documents that school leadership teams should familiarise themselves with in order to adhere to the COVID-19 Safety plan laid out in this document.

### Definitions

RAT – Rapid Antigen Test    PCR – Polymerase Chain Reaction (COVID Test)

PPE – Personal Protective Equipment

## Part A – Prevention of infection

### Requirements for schools and the TCEO

1. If a student or a member of staff are seen to be displaying cold or flu symptoms *assume COVID infection*. For a student arrange transport home as soon as possible. In the case of members of staff — direct to them to go home *as soon as possible*.
2. Each CET workplace must implement CET's COVID-19 Safety Plan (this document).
3. The CET Workplace COVID Safe Checklist must be completed monthly (Appendix A).
4. Schools can undertake such activities that are necessary for the normal business of a school. *See Part C - School Activities for further details*.
5. Atypical school activities involving visitors such as a school fair are required to be managed under the government's [A Framework for COVID-19 Safe Events and Activities in Tasmania](#).
6. Schools are not subject to any limit, apart from building occupancy limits, regarding the number of students and staff who may gather to engage in a *normal school activity*.
7. Staff and students over the age of 12 years except those students in a primary setting must wear a mask when indoors.
8. TCEO staff *must* wear a mask when indoors.
9. Visitors and contractors must wear a mask when indoors on all CET premises.
10. All adults, including staff, must use the Check in Tas App in-conjunction with the school's QR code upon each school visit. Parental drop off excluded. TCEO staff excluded for primary TCEO office.
11. All visitors (including contractors) to a TCEO office *must check in using the Check in Tas app*.
12. Strive to ensure staff, parents and carers maintain 1.5m distancing where practicable.
13. Deploy signage to encourage appropriate COVID safe behaviour by adults.
14. No interstate student travel.
15. Daily cleaning of surfaces touched at high frequency by both staff and students.
16. Ensure adequate supplies and distribution of hand sanitiser are available.
17. Promote personal hygiene and cough/sneeze etiquette.
18. Staff and students are required to stay home if they are unwell with a respiratory illness.

### Requirements for staff

1. Vaccination is highly recommended. The risk of hospitalisation due to COVID-19 infection for an unvaccinated person is *25 times greater* than that for a vaccinated person.
2. If you are fully vaccinated, you are encouraged to get your booster (third) vaccination as soon as possible (typically four months) after your second vaccination.
3. Do not enter a CET workplace if you have returned a positive PCR result or a positive rapid antigen test result — regardless of the symptoms you are displaying.
4. Do not enter a CET workplace if you have been deemed to be a close contact of an infected person i.e. having been a household contact or having had sufficient workplace exposure whilst not wearing a mask (for further details see Part B – Close contact management).

5. Do not enter a CET workplace if you have cold or flu-like symptoms. Seek to undertake a rapid antigen test ASAP.
6. Inform your manager/principal of your positive infection/close contact/cold or flu symptom status as soon as possible.
7. If you have tested positive for COVID-19 you can discuss with your manager/principal the possibility of working from home whilst in isolation.
8. If you are a close contact, you can discuss with your manager/principal the possibility of working from home whilst quarantining.
9. If you have cold or flu-like symptoms, have not returned either a positive PCR result or a positive rapid antigen test and personal leave is not necessary, you can discuss with your manager/principal the possibility of working from home for the work day component of the 5-day period following the onset (day 1) of symptoms.
10. You must wear a mask when in a CET indoor workplace except when:
  - You are the sole occupant of an office or driving alone in a CET vehicle.
  - Clear enunciation is required.
  - Eating, drinking or taking medicine.
  - Wearing a mask would create a WHS risk for you, or there is a medical exemption.
  - It is an emergency, and it is not practicable or safe to wear a mask.
11. Whenever possible maximise ventilation in your workspace — open the window.
12. Minimise time spent in a poorly ventilated workspace.
13. If you have underlying health conditions that increase your vulnerability to COVID-19 illness you are encouraged to avoid prolonged contact with colleagues unless you have the following measures are in place:
  - You are fully vaccinated.
  - You are wearing a mask.
  - The meeting space or workspace is well ventilated.
  - You can maintain social distancing.
14. Continue to practice good personal hygiene.
15. Support the implementation of CET's COVID-19 Safety Plan (this plan).

## **Part B – Case Management**

### **Response to a member of staff who reports they are infected with COVID-19**

Should a staff member who has been in a CET workplace during the three working days prior to returning a positive COVID-19 test result (PCR or RAT) the following steps will occur:

- If the member of staff is not in a CET workplace when they became aware of their positive status they must:
  - *Under no circumstances enter a CET workplace.*
  - Inform their manager/principal of their status ASAP.
- If the member of staff is in a school when they become aware of their positive status they must:

- If in a student supervisory role, immediately inform their principal, ensure adequate replacement supervision of students is in place then leave the school and go home to isolate themselves.
- If not teaching, immediately inform their principal then leave the school and go home to isolate themselves.
- If the member of staff is in a TCEO office when they become aware of their positive status they must:
  - Leave their workplace and go home to isolate themselves, having spoken with the appropriate person.
  - Having first left their workplace, they must then inform their manager of their diagnosis.
- Managers/principals who have been informed by a member of staff that they have returned a positive test result *must inform their assigned WHS officer* and, if applicable, their regional principal leader.
- It is Public Health protocol to contact the relevant employer when an infected person has been identified as being present in a workplace whilst infectious. Should contact not be made by Public Health in a timely manner, CET will undertake workplace contact tracing and discern the classification of workplace close contacts.
- CET will take then take following steps:
  - The workplace will be *kept open* unless directed by Public Health or the TCEO to close.
  - The applicable manager/principal, assigned WHS officer and the confirmed case (if able) shall identify those colleagues who were not wearing a mask whilst in contact with the infected member of staff during infectious period.
  - The workspaces of the confirmed case and their close contacts will be cleaned and disinfected.
  - All other members of staff will continue to *implement the COVID-19 management measures* listed above in Part A.
  - The applicable manager/principal will *regularly monitor the welfare* of those persons in isolation (confirmed cases) or quarantine (close contacts).
  - The applicable manager/principal will regularly *monitor anxiety levels* amongst colleagues of the infected person and should consider options such as working from home for the rest of the day, while cleaning occurs, where advisable.
- Persons with COVID-19 symptoms, diagnosed or not, must *isolate for a minimum of 7 days*. If the person still has symptoms on day 7 then they must continue their isolation for a further 3 days.

### **School response to a confirmed case**

When informed either by Public Health, the confirmed case (likely to be a member of staff but could be a contractor or a visitor) or a parent/guardian that there is/has been a confirmed case at your school you should do the following:

1. Ask the person contacting the school the following questions:
  - **If contacted by a Public Health official:**

- The name and date of birth of the confirmed case(s).
  - What contact tracing information is needed and what date range applies (typically a 72-hour period before either onset of symptoms or a positive COVID test (if asymptomatic)).
  - Who will be the school's Public Health contact (record name, email and mobile number).
- **If contacted by confirmed case or parent / guardian**
    - Name, date of birth (if student)
    - Evidence of diagnosis
    - Date and time on school premises if visitor or contractor.
2. Do not close your school unless directed by Public Health or the TCEO.
  3. Inform your regional principal leader and assigned WHS officer ASAP.
  4. If necessary, identify staff to assist with identification of close contacts – these are adults or secondary students who were not wearing a mask whilst in contact with the confirmed case whilst the confirmed case was infectious (see Part D – COVID-19 characteristics).
  5. In-conjunction with your assigned WHS officer commence identification of close contacts (see Close contact management below for definition).
  6. If requested, provide Public Health with the contact details of close contacts.
  7. Activate your quarantine room/space. Must be well ventilated, secure from intrusion and have sufficient area for close contacts to social distance.
  8. If close contacts are still on site, identify their whereabouts.
  9. Contact all persons you identify as a close contact of the case and instruct them to move to the designated quarantine room / space.
  10. Ensure all 12 years+ close contacts wear masks until they leave the school and encourage this beyond.
  11. Advise close contacts or their parents & guardians that close contacts must quarantine at home and to take rapid antigen test on day 1 and 6 of their quarantine.
  12. Organise transport for students who have been deemed to be close contacts. *Do not allow use of public transport.*
  13. Continue with scheduled activities and reinforce:
    - Hand/personal hygiene.
    - Ventilation.
    - Physical distancing amongst staff.
    - Mask wearing by staff and students (12 years and older).
  13. Provide updates/reminders to staff/parents & carers/stakeholders.
  14. Do not share any personal information.
  15. Arrange *cleaning of high frequency touched surfaces* in the main indoor locations where the confirmed case spent time, in the date range.

16. Cordon off applicable spaces/rooms until cleaning/disinfection is completed.
17. Assist staff who are directed to isolate/quarantine to submit the relevant HR applications (Work from Home, COVID-leave etc.)
18. Report the incident using the *WHS incident report form found on CETKP*.
19. As people's isolation (7 to 10 days for confirmed cases) / quarantine (7 days for close contacts) periods end:
  - Welcome them back to site and continue normal activities.
  - Debrief on actions taken and pass on suggestions regarding updates to TCEO plans and procedures to Manager Risk, WHS & Compliance.
  - Monitor well-being of staff, volunteers and students.

## **Close contact management**

Tasmania has adopted the national definition of a close contact as *a person who usually lives with or who has visited the same household for more than 4 hours as a confirmed case during their infectious period*. A close contact can also be someone that has spent 4 hours at the same site, workplace or venue as a confirmed case during a significant transmission event.

Colleagues of a confirmed case who were in a workplace or education facility whilst infectious will not be deemed to be close contacts provided they wore a mask during their exposure to the confirmed case, whilst the confirmed case was infectious.

A close contact in a CET school or workplace setting is someone who has had extensive face-to-face contact with an infected person for more than four cumulative hours during that person's infectious period and appropriate WHS measures were not in place e.g. a mask was not being worn.

It is unlikely that mask exempt students will be deemed close contacts due to school contact with a confirmed case. Should there be more than one confirmed case in class it is possible that all members of the class will be required to take a rapid antigen test (at home) and those who return a negative result will be able to resume face-to-face learning.

A teacher or a volunteer who wears a mask in the required manner will not be deemed a close contact in circumstances where the infectious person is one of their students.

The applicable manager/principal, assigned WHS officer and the confirmed case (if available) shall identify those colleagues who have been in close proximity with the confirmed case *since the person became infectious*.

If a member of staff or a student is deemed to be a close contact, they must:

- Not come to work/school.
- Get a RAT as soon as they become aware that they are a close contact.
- Quarantine for 7 days irrespective of exhibiting symptoms or not. The 7 days starts from their last close contact with the infected person — not the date of notification.
- Take another RAT on day 6 of the quarantine period
- If either RAT returns a positive result, then they must get a PCR test - will need to register online at <https://covidtestbooking.health.tas.gov.au/>.
- The close contact can leave quarantine on day 7 provided they are free of symptoms.  
Note: close contacts will not be contacted by Public Health.

## **Educational equity**

Schools are required to *strive to maintain the delivery of face-to-face learning*. However, where there more than a few close contacts in a class and to ensure educational equity, it may be preferable for the whole class to, in effect, quarantine and receive their education via online means. This will be a *decision for the principal* following the completion of contact tracing, once having consulted with the their Regional Principal Leader.

## **COVID leave**

Staff diagnosed as being infected with COVID-19 or notified as having been a close contact of a person infected with COVID-19 can apply for COVID Leave to cover their time in isolation/quarantine if too unwell or unable to work from home. Applications must be accompanied by appropriate evidence e.g. positive test result or a direction from Public Health / TCEO to isolate or quarantine.

## **Part C – School activities**

### **Student interstate travel**

Student interstate travel is not permitted until further notice.

### **Camps**

Camps are permissible.

Public Health has issued the following requirements regarding school camps:

- The 2m<sup>2</sup> rule within premises including dormitories.
- COVID Safe behaviours such as hand hygiene, cough etiquette and social distancing should be encouraged
- A camp COVID safety plan is developed and implemented.
- A person is appointed as the person to be contacted in respect of the camp.
- Students and staff should be advised not to attend if they have symptoms and a protocol developed for a student who develops symptoms while on camp.
- A register of all attendees should be kept and provided to Public Health where requested.
- Contingency plans considered if a camp needs to be cancelled both before or during the camp due to a change in restrictions imposed in the state.
- The camp, and the premises where the camp is held, complies with each obligation, requirement, restriction or condition that applies to the gathering or premises under a direction made under the Public Health Act.

### **Sport**

Sport, sports carnivals and inter school competition are all currently permissible.

Under the Public Health Direction Management of Premises No. 13 of 14 May 2021: Schools / school activities with only staff and students in attendance are exempt from any gathering limits.

Under the Public Health Direction Mass Gatherings No. 4 of 19 April 2021: Public events with more than 250 people in attendance need to have a COVID management plan and COVID safety officer.

Therefore, a multi school event with many parents in attendance such as an inter-school athletics carnival would require a COVID management plan and COVID safety officer.

However, a multi school event with no parents in attendance would not require a COVID management plan and COVID safety officer.

Nor would, for example, a GYC vs. Dominic AFL match at Dominic on a Wednesday afternoon with between 10 to 20 parents in attendance - QR code use, COVID signage and hand sanitiser would suffice.

Note the primary task of an event COVID safety officer is to coordinate COVID management resources at events attended by a large number of parents. Hence, one is not necessary where there are only a few parents at an event who are quite capable of voluntary compliance.

Further to the above regarding the conduct of an inter school sport event please contact SATIS for management advice.

There are no restrictions on students participating in a community sport organised by a sport association/federation/league which has recommenced a weekly team/inter-club competition. If a team of students is using the school name and colours has entered one of these competitions then the school should look to satisfy itself that the competition is being run in accordance with the association's/federation's/league's COVID-19 management guidelines.

## **School events, celebrations and social events**

### ***Major events involving parents***

Should a school decide to hold a large event (>250 persons) involving parents / members of the public then it will need to comply with [Tasmanian Government's A Framework for COVID-19 Safe Events and Activities in Tasmania](#).

For administrative ease schools are advised to restrict attendance at these types of events to no more than 1000 people in order for the event to be classified as a tier 1 event under the Events Framework.

If using the Events Framework to manage a major event, then please note the following:

- Specific entry and exit points are required to facilitate flow of foot traffic and minimise interactions.
- Assigned staff/adults need to be in place to manage associated physical distancing requirements.
- Hygiene and cleaning requirements are in place - such as hand sanitizer available at entry and exit points and signage.
- The event may need its own QR code and adults will need to use the Check in Tas app.
- If using an offsite venue comply with the venue's COVID safety plan requirements - if no venue plan, develop an event specific plan.

### ***School celebrations***

Public Health has developed some clear guidance to allow celebrations and social events to occur on school sites.

These events are permitted but will need to be held in accordance with current Public Health directions. This means that it will be required that these events are undertaken within the venue density requirements of the site on which they are planned to be held.

Dancing will be able to occur, however all events will need to adhere to the requirement to have two separate areas for eating/drinking and dancing.

COVID safe behaviours including hygiene measures and visitor screening will need to be applied to such events.

Celebrations taking place off site will need to comply with the venue's COVID Safety plan.

## **Use of external venues**

Schools wishing to use external venues such as indoor sporting facilities or an outdoor council operated sports grounds will need to take into account the following:

- The possibility that the venue requires vaccination as a condition of entry.
- Public Health Direction Management of Premises No. 16, 9 December 2021.
- Framework for Rebooting Sport in a COVID-19 Environment, Australian Institute of Sport, 15 May 2020.

## **Part D - General**

### **COVID-19 safety plan**

Public Health Direction – Workplace COVID Plan No. 2 issued 18 December 2020 requires CET to implement the measures set out in the Direction including the documentation of those measures in a COVID-19 safety plan.

Hence, the purpose of this COVID-19 Safety Plan is twofold:

- To support adequate COVID-19 risk mitigation in CET workplaces.
- To assist CET staff to comply with the requirements of the COVID-19 Safe Workplaces Framework.

Each CET workplace must implement CET's COVID-19 Safety Plan.

Responsibility for the implementation of this plan and monthly utilisation of CET's Workplace COVID Safe Checklist (Appendix A/CETKP) primarily lies with the relevant CET workplace manager e.g. principal, supported by their assigned WHS officer.

### **COVID-19 characteristics**

#### ***Symptoms***

- a cough
- fever
- shortness of breath
- a loss or change to taste or smell
- fatigue
- body aches
- headache
- sore throat
- runny nose

#### ***Symptom management***

Staff and students should not attend school if they are displaying cold or flu-like symptoms.

Staff and students should stay home and phone their GP or the Public Health Hotline on 1800 671 738 for a referral to be tested for COVID-19.

#### ***Disease time frame***

- Day 1 of infection — you have had sufficient exposure to an infected person for you to become infected.
- Days 3 to 5 — onset of symptoms.

- Days 10 to 12 — you should be free of symptoms and OK to leave isolation (provided you have completed 7 days of isolation after the onset of symptoms or receiving a positive test and are symptom free, if not continue to isolate for a further 3 days).

### ***Period of infectiousness***

For the Omicron variant the window between becoming infected and being infectious (shedding viral fragments in exhaled breath) to others appears to be shorter than that for other variants i.e. 2 days before the onset of symptoms through to 3 days after the onset of symptoms.

### **Check in**

Schools are required to facilitate the collection of visitors (such as parents and contractors) contact details using a site specific QR code in-conjunction with visitor use of the Check In Tas app.

- Adults and visitors over the age of 16 years on entering a school building must use the Check In Tas app each visit. Note: *Staff will only need to check in on their first entry to the school for the day.*
- Check In app use is not a substitute for a school's normal sign in arrangements, it is an addition. For example, a parent help volunteer would need to check in and sign in whereas a parent coming to the office to sign out a child for a doctor's appointment would only need to check in.
- Students at school or on a school excursion are exempt from the check in requirement
- Parents dropping off or collecting children from childcare/school are exempt from the check in requirement.
- The school must have a *location specific QR code* which is compatible with the Check in Tas app.
- The QR code must be displayed in prominent locations accessible to visitors.
- Applies to non-school events held on school grounds/premises that require an event COVID safety plan.
- For those visitors that do not have a phone or the Check in Tas app, *the school must provide an electronic means of accessing the Check in Tas app.*
- Contact details are not to be recorded using pen and paper *except when there is no internet coverage* and hence the Check in Tas app cannot be used.

### **COVID-19 testing, quarantine and isolation**

Staff must advise their manager/principal as soon as it is practical that Public Health has directed them to undergo COVID-19 testing and/or quarantine/isolate.

Similarly, staff must advise their manager/principal as soon as it is practical of their COVID-19 status upon receipt of the test result and, should the test result be positive, the subsequent expiry of their isolation period.

Where a member of the immediate household of a member of staff or a student has been referred for a COVID-19 test by a GP or Public Health, that member of staff or student *does not need to quarantine* unless the person who is tested returns a positive result.

Where a member of staff or student, who does not have COVID-19 symptoms or is not in quarantine, has been referred for a COVID-19 test by Public Health, then that member of staff or student can still attend their school or any other CET premises until they have received their result.

Where a person who has been tested returns a positive result then all members of their immediate household must not enter a CET school or CET premises until the member of the household with the COVID-19 infection has completed their isolation period and are free of symptoms and other members of the household have completed their quarantine period without developing COVID-19 symptoms.

## **Cleaning and hygiene**

Staff must take personal responsibility for their hand and overall hygiene. Of all the COVID-19 cleaning measures hand hygiene is the most effective. A properly disinfected surface or object can only be regarded as free of contamination whilst it has not been touched or coughed upon.

Achieving compliance with CET COVID-19 safety requirements includes:

- Complying with the COVID-19 cleaning and hygiene practices set out in Appendix C.
- Ensuring adequate cleaning / hygiene materials are provided to staff and students.
- Active engagement of all school staff in the maintenance of appropriate cleaning and hygiene standards in the school environment.
- Where necessary, expanding the scope of the services provided by school cleaners.

### ***Cleaning following a confirmed case***

Following a confirmed case of COVID-19, thorough cleaning and disinfection of the high frequency touch points in their workspace(s) is needed, to remove the virus from surfaces.

There is no automatic need to close an entire facility/setting while cleaning and disinfection is underway, particularly if the confirmed case only visited parts of the facility/setting.

Cleaning and disinfection for non-health care settings follows the same principles as routine cleaning and disinfection, except:

- Cleaning staff should wear disposable gloves, a long-sleeved gown and a surgical mask plus eye protection or a face shield while cleaning and disinfecting
- Cleaners should be trained in putting on and removing personal protective equipment (PPE)
- Areas may need to be prepared to ensure proper cleaning and disinfection e.g. removing personal effects
- Soft or porous surfaces may need attention e.g. steam-cleaning or laundering of fabrics.

## **Physical distancing**

It is a requirement for all staff/adults engaged in the conduct of permissible school activities, as well as TCEO staff to strive to adhere (where practicable) to physical distancing requirements.

The AHPPC has advised that the 'venue density rule' is not appropriate or practical in classrooms or corridors, nor is maintaining 1.5m between students. However, it is advisable that:

- School staff continue to practice 1.5m physical distancing where practicable amongst each other (such as in staff rooms and offices).

- Schools strive to ensure staff and parents/carers maintain 1.5m distancing where practical.
- Schools deploy signage to encourage appropriate COVID safe behaviour by adults.
- TCEO staff continue to practice 1.5m physical distancing where practicable and the venue density 2m<sup>2</sup> per person rule (such as in staff rooms and offices).

## **Vulnerable people**

Our duty of care requires CET to *protect vulnerable persons* in the workplace.

CET are required to ensure unvaccinated staff who are deemed vulnerable to serious illness should they become infected with COVID-19 participate in a risk assessment to determine if it is reasonably practicable to manage their risk of infection in a CET workplace.

Unvaccinated CET staff who have any of the health condition(s) or receive any of the medical treatments listed in the risk assessment form in Appendix B or who are aged 70 years and older must, together with their line manager, complete a risk assessment using the form provided in Appendix B and request a medical clearance from their doctor. The completed risk assessment and medical clearance (if provided) must be submitted to the relevant Principal/Director for endorsement and placement on personnel file.

With respect to the attendance of students who are subject to any of the above conditions or treatments there is no formal requirement to obtain a medical clearance. Instead, it is recommended the focus be on seeking the provision of appropriate medical advice in instances where schools are not already aware of the student's medical condition. Schools are encouraged to work with parents/carers to ensure that appropriate support is provided to meet the students' needs, taking into account the medical advice that has been provided.

## **Working from Home**

Should CET be required to close a CET workplace, some staff may be directed to work from home.

In order to effectively support staff working from home, working from home is to be managed in accordance with CET's Working from Home Guideline.

The primary objective of the Working from Home Guideline is to ensure worker safety whilst working from home.

Workplace managers will discuss the viability of working from home with relevant staff. Should staff have their manager's support to work from home then they are required to complete the Working from Home Checklist (if have not already done so) and return it their manager prior to commencing working from home.

## **Communication, instruction and training**

Each CET workplace is required to provide information and instruction to people who attend that workplace about how they are to comply with physical distancing, cleaning and hygiene requirements.

Comply with communication, instruction and signage requirements detailed in CET's Workplace COVID Safe Checklist – Appendix A.

Please see the signage examples located on the COVID-19 Resources page on your school CETKP site.

## **Monitoring and supervision**

Comply with the monitoring and supervision requirements detailed in CET's Workplace COVID Safe Checklist – see Appendix A.

## **Records**

Create and securely store records of all COVID-19 related management actions and initiatives undertaken in the workplace. In particular:

- Relevant SOCs
- Workplace newsletters
- Communication to staff and parents
- Health and Safety Committee meeting minutes
- Minutes of staff consultation meetings
- Completed weekly checklists
- All other pertinent records

## Appendix A

# WORKPLACE COVID SAFE CHECKLIST

EXAMPLE ONLY - please use the CETKP Assurance Version. Designated workplace WHS officer to complete monthly

Topic	✓	X	Actions (if any)	Close out of action
<b>CET COVID-19 Safety Plan</b>				
Workplace manager e.g. Principal has an up-to-date copy of the CET COVID-19 Safety Plan				
Staff briefed on key requirements of plan				
<b>Workplace entry</b>				
All staff are aware that persons who are unwell or subject to an isolation order are not enter the premises				
<b>Hygiene</b>	✓	X	<b>Actions</b>	<b>Date</b>
Signage is in place to promote the regular washing of hands				
Signage is in place to encourage the avoidance of touching eyes, nose and mouth				
Adequate supply of sanitizer and these products are distributed throughout the school for use by staff and students				
<b>Cleaning</b>	✓	X	<b>Actions</b>	<b>Date</b>
The school's cleaning procedure includes daily cleaning of high touch surfaces				
Cleaning / disinfecting of frequently used objects such as computers, photocopiers and music equipment				
Cleaning of toilets at the end of each day				
Adequate supply of cleaning products				
<b>Physical Distancing - Adults</b>	✓	X	<b>Actions</b>	<b>Date</b>
Work arrangements have been adjusted to allow for physical distancing for adults of at least 1.5 metres where practicable				

'Zoom meetings' used when appropriate				
Signage to encourage adults to maintain physical distancing where practical				
<b>Physical Distancing – Students</b>	✓	X	<b>Actions</b>	<b>Date</b>
Designated space(s) for children to wait for collection if they become unwell with cold or flu-like symptoms				
<b>Check In</b>	✓	X	<b>Actions</b>	<b>Date</b>
Contact details being recorded by adults using the Check In Tas App.				
<b>Responding to a Confirmed or Suspected Case</b>	✓	X	<b>Actions</b>	<b>Date</b>
The leadership team are aware of the processes to be undertaken in the event of a suspected or confirmed case				
<b>Supporting Staff</b>	✓	X	<b>Actions</b>	<b>Date</b>
Public Health and CET advice about COVID-19 communicated to staff

## Appendix B

# VULNERABLE STAFF RISK ASSESSMENT

To be completed by employee and line manager then endorsed by relevant principal / director

WHS regulations require Catholic Education Tasmania to ensure unvaccinated staff who are vulnerable to serious illness were they to be infected with COVID-19 participate in a risk assessment to determine if it is reasonably practicable to manage their risk of infection in a CET workplace.

**At work / want to return to work** – Unvaccinated CET staff who have any of the health condition(s) or receive any of the medical treatments listed in the table below or who are aged 70 years and older are considered vulnerable and must, together with their line manager, complete this risk assessment and request a medical clearance from their medical practitioner. The completed risk assessment and medical clearance (if provided) must be submitted to the relevant Principal / Director for endorsement and placement on personnel file.

**Not at work / want to work at home** – these staff must either (a) provide a medical certificate, where the issuing medical practitioner has made a reasonable assessment of the risk of infection based on extent of COVID-19 infection in the community at the time of issue, which expressly confirms the medical condition(s) and advises against their attendance in their normal CET workplace(s) due to having one or more of the conditions listed in the form below or (b) obtain an exemption from the Executive Director of CET. In obtaining a medical certificate / an exemption the person must provide their medical practitioner / the Executive Director of CET with a completed CET Vulnerable Staff Risk Assessment.

Other (Description):

None of the above

### Section 3 – Employee confirmations

Yes / No

Comments

Are you aware of your CET's personal hygiene and facilities / equipment cleaning requirements?

Are you aware of CET's workplace exclusion requirements for COVID-19 testing, close contacts and confirmed cases of infection?

Are you aware of CET's workplace physical distancing requirements for adults?

---

If unsure of any of the above requirements request a copy of CET's COVID-19 Safety Plan<sup>1</sup>

*1 - CET's COVID-19 Safety Plan – see COVID-19 resources section on CETKP*

### Section 4 - Line Manager (or Principal)

Yes / No  
/ NA

Comments

Can the employee's role be performed in accordance with CET's workplace physical distancing requirements for adults?

Does the employee's role require situations where close contact with students is unavoidable?

Is it practicable to modify work arrangements to address the potential for breaches of the physical distancing requirements?

Are there operationally effective alternatives for the employee when the risk of infection cannot be adequately mitigated or a medical clearance cannot be obtained?

#### Section 4 – Employee medical certificate

Did you provide this risk assessment to your medical practitioner when requesting a medical clearance / certificate? (ensure you attach clearance / certificate)

#### Section 5 - Comments – any other relevant information

#### Section 7 – Signing authorities

Full Name	Signature	Date
-----------	-----------	------

Employee:

Line Manager

Principal / Director:

#### Section 8 - Checklist

- All sections completed
- Vaccination certificate
- Medical clearance / certificate attached
- Authorised copy placed on personnel file

## Appendix C

# CLEANING AND HYGIENE

### Cleaning:

- Clean at least daily shared<sup>1</sup> electronic equipment e.g. iPads, touch screens, etc. Refer to manufacturer's recommendations or if no manufacturers recommendations use isopropyl alcohol-based preparations with non-electrostatic wipes suitable for electronic equipment.
- Clean + disinfect at least daily<sup>1</sup> frequently used high-touch surfaces such as benchtops, doorknobs, taps, and hand rails with a detergent solution or detergent/disinfectant wipes.
- Clean toilets at least daily<sup>1</sup>.

1 - Safe Work Australia 30 April 2020.

### Hygiene:

- Wash hands with soap and water for 20 seconds or use hand sanitiser, when entering school, and at regular intervals throughout the day:
  - particularly before and after eating, and after going to the toilet
  - for younger students, this may include having a regular handwashing schedule
- Cover coughs and sneezes with one's elbow or a tissue.
- Avoid touching one's eyes, nose and mouth.
- Do not permit sharing food or drink.
- Close communal water fountains/bubblers.
- Promote strictest hygiene amongst food preparation (canteen) staff and their close contacts

### *Hand sanitiser advice*

To reduce the risk associated with alcohol-based sanitisers, it is advised that if given the option, you should always wash your hands with soap and water versus using hand sanitiser. It's not only safer but if done correctly for at least twenty seconds it is much more effective in controlling COVID-19.

If using alcohol-based hand sanitiser the following precautions should be undertaken:

- Remember that alcohol-base hand sanitiser is flammable and should be handled with caution.
- Do not apply excessive amounts of sanitiser
- Do not use near any ignition sources when you apply hand sanitiser.
- Ensure storage of flammable liquids in a safe manner and maintain methods for quick exits in case of fire.

### Kindergarten:

With respect to COVID-19 cleaning and hygiene practices in a kindergarten setting, kindergarten staff are advised to prioritise their personal hygiene and to implement the required cleaning and hygiene practices with respect to cleaning of surfaces and hygiene of students where prac

## Appendix D

# COVID-19 SITE CLOSURE PLAN

## Contents

1. Introduction	2
2. Application	2
3. Closure Direction Response	3
4. Working from Home	4
Appendix A - Incident Response Team	5
Appendix B - Communications	7
Appendix C - Cleaning and Disinfection	9
Appendix D - Response Preparations	10

## **1. Introduction**

There are several COVID-19 related circumstances that could see Public Health or the TCEO requiring the closure of a CET workplace such as a school.

It is expected such closures would be for at least 48 hours to allow sufficient time for amelioration activities such as:

- Public Health to trace who has been in close contact with the infected person(s)
- Preparation of at home learning.
- Completion of cleaning.

The purpose of this plan is to document the activities that the TCEO and the COVID-19 impacted CET workplace(s) will undertake in responding to a direction to close the workplace.

Key objectives are to:

- prevent the further spread of COVID-19 within a CET workplace and the community;  
and
- remediate the workplace to enable the resumption normal operations.

The implementation of response measures will be scaled according to the level of COVID-19 transmission risk and the availability of resources.

## **2. Application**

This plan applies to all CET workplaces including TCEO offices, schools and colleges.

### 3. Closure Direction Response

The workplace manager / principal when informed of the need to temporarily close their workplace / school will be guided by the following steps:

1. Schools - report closure direction to the relevant regional principal leader who will inform the Executive Director, Deputy Executive Directors and the Manager Risk. WHS & Compliance.
2. TCEO workplace - report closure direction to the Executive Director and the Manager Risk. WHS & Compliance.
3. Ensure appropriate isolation of confirmed cases and appropriate quarantining of close contacts.
4. The TCEO may appoint an Incident Coordinator to assist the manager / principal manage the workplace/school closure. See Appendix A – Incident Response Team.
5. Prepare for workplace closure.  
Principals - be ready to contact parents / carers, bus operators etc  
See Appendix B - Communications
6. Suspend normal operations / close the workplace in liaison with the Incident Controller on advice from Public Health#.  
Schools - do not treat closure as an emergency evacuation. It may take the whole of the school day and include the use of normal bus services to clear the school of students. Student safety is a paramount consideration when overseeing the closure of the school.
7. In consultation with Incident Coordinator, develop and circulate status reports and situation updates to inform, in a timely manner, staff, students, families and other key stakeholders of the situation as it unfolds. For guidance refer to Appendix B - Communications.
8. In consultation with the Incident Coordinator, implement enhanced cleaning as per Appendix C - Cleaning and Disinfection.

#Full workplace closure may not be required in some circumstances. The extent of closure will depend on factors such as the size of the workplace, nature of the work, number of people and potential areas of contamination.

## **4. Working from Home**

Should CET be required to close a CET workplace, some staff may be directed to work from home.

In order to effectively support staff working from home, working from home is to be managed in accordance with CET's Working from Home Guideline.

The primary objective of the Working from Home Guideline is to ensure worker safety whilst working from home.

Workplace managers will discuss the viability of working from home with relevant staff. Should staff have their line manager's support to work from home then they are required to complete the Working from Home Checklist (if have not already done so) and return it their manager prior to commencing working from home.

## Appendix A - Incident Response Team

Role/Function	Responsibility	Responsibilities
<b>Case response coordination</b>	CET Incident Controller – relevant Deputy Executive Director as appointed by Executive Director	<ul style="list-style-type: none"> <li>• Lead the TCEO’s COVID-19 incident response team.</li> <li>• Lead and coordinate activities required within the workplace to contain the spread of infection.</li> <li>• Participate in the Public Health Outbreak Management Team.</li> <li>• Liaise with key stakeholders.</li> <li>• Identify and manage enterprise risks arising from the incident.</li> </ul>
<b>Planning</b>	Manager RWC	<ul style="list-style-type: none"> <li>• Liaise with Public Health regarding infection prevention and control measures.</li> <li>• Develop and adjust plans.</li> </ul>
<b>Infection prevention and control coordination</b>	Workplace manager e.g. Principal	<ul style="list-style-type: none"> <li>• Comply with CET’s COVID-19 Safety Plan.               <ul style="list-style-type: none"> <li>○ Responsible for communications with school community.</li> </ul> </li> <li>• Arranges cleaning of site, in line with Public Health directions.</li> <li>• Provides updates to Incident Response Team.</li> <li>• Adjust service delivery as needed.</li> <li>• Updates staff and students / families on re-opening details.</li> <li>• Update staff on relevant leave administration actions.</li> <li>• Ensure adequate supplies of PPE and cleaning products.</li> <li>• Ensure staff understand and apply required infection prevention and control precautions as directed by Public Health.</li> <li>• Ensure cleaning staff are kept informed about enhanced cleaning measures and infection prevention and control measures.</li> <li>• Oversee cleaning activities; hire additional cleaners as required.</li> <li>• Monitor and maintain resources, e.g. hand sanitiser and disposable tissues.</li> <li>• Display COVID-19 signage.</li> </ul>

		<ul style="list-style-type: none"> <li>• Monitor return of staff/students/families e.g. in line with isolation /quarantine periods.</li> <li>• Communicates at site level as needed.</li> <li>• Finalise records – student absence reporting, staff leave approvals etc.</li> </ul>
<b>Information management</b>	Senior WHS Officer	<ul style="list-style-type: none"> <li>• Collect and collate data to help control the outbreak e.g. number of people in the workplace, number of symptomatic people, number of people in the workplace waiting for test results.</li> <li>• Provide daily reports for the CET Incident Response Team and other key stakeholders as requested.</li> </ul>
<b>Communications</b>	Relevant Regional Principal Leader	<ul style="list-style-type: none"> <li>• Internal communications.</li> <li>• Stakeholder communications.</li> <li>• Media and public communications.</li> </ul>
<b>Staff management</b>	System Manager People Services	<ul style="list-style-type: none"> <li>• COVID-19 leave.</li> <li>• Leave provisions.</li> <li>• Working from home.</li> </ul>
<b>Administration support</b>	Directorate	<ul style="list-style-type: none"> <li>• Organise Incident Response Team meetings.</li> <li>• Record and distribute minutes of meetings.</li> </ul>

## Appendix B - Communications

For consistency and accuracy of messages, and as part of the coordinated response, communications activities will be coordinated through the TCEO COVID-19 Incident Response Team in-conjunction with Public Health.

Key stakeholder	What they need to know	Method of communication
<b>Public Health</b>	<ul style="list-style-type: none"> <li>• COVID-19 management risks specific to the workplace.</li> <li>• Names and contact details of close contacts of the confirmed case.</li> <li>• Workplace description (location, business activities, number of staff/students)</li> <li>• Site plan.</li> <li>• Copy of CET's COVID-19 Safety Plan</li> </ul>	<ul style="list-style-type: none"> <li>• Email</li> <li>• Telephone</li> <li>• Meetings</li> </ul>
<b>Students</b>	<ul style="list-style-type: none"> <li>• Level of risk, number and location of cases linked to an outbreak</li> <li>• Contact tracing process</li> <li>• Cleaning arrangements</li> <li>• Access to wellbeing support</li> </ul>	<ul style="list-style-type: none"> <li>• Meetings</li> <li>• Newsletter</li> <li>• Text Messages</li> <li>• Social media</li> <li>• Signage</li> </ul>
<b>Staff</b>	<ul style="list-style-type: none"> <li>• Level of risk, number and location of cases linked to an outbreak</li> <li>• Contact tracing process</li> <li>• Cleaning arrangements</li> <li>• Access to wellbeing support EAP</li> <li>• Membership of the TCEO incident response team</li> <li>• Arrangements for accessing leave for quarantine and isolation</li> <li>• Expectations about not attending work if sick</li> <li>• Changes to staffing/rostering arrangements</li> <li>• Arrangements to support staff health and wellbeing</li> </ul>	<ul style="list-style-type: none"> <li>• Staff Office Circulars</li> <li>• Meetings</li> <li>• Staff Newsletter</li> <li>• Text Messages</li> <li>• Workplace Intranet</li> <li>• Signage</li> </ul>
<b>School community</b>	<ul style="list-style-type: none"> <li>• Level of risk, number and location of cases linked to an outbreak</li> <li>• The importance of hand hygiene, respiratory etiquette and physical distancing measures</li> <li>• Changes to policies and procedures; infection control measures being implemented, including changed arrangements for accessing the workplace</li> </ul>	<ul style="list-style-type: none"> <li>• Meetings</li> <li>• Newsletter</li> <li>• Text Messages</li> <li>• Social media</li> <li>• Signage</li> </ul>
<b>Parents and carers</b>	School / college access restrictions	<ul style="list-style-type: none"> <li>• Workplace signage</li> <li>• Internet</li> <li>• Text / email</li> </ul>

		<ul style="list-style-type: none"> <li>• Social media</li> </ul>
<b>Visitors</b>	School / college access restrictions	<ul style="list-style-type: none"> <li>• Workplace signage</li> <li>• Internet</li> <li>• Text / email</li> </ul>
<b>Contractors</b>	School / college access restrictions	<ul style="list-style-type: none"> <li>• Workplace signage</li> <li>• Internet</li> <li>• Text / email</li> </ul>
<b>WorkSafe Tasmania</b>	<ul style="list-style-type: none"> <li>• Cases in staff where incident notification is required under <i>Work Health and Safety Regulations 2012 – Reg 699</i>.</li> </ul>	<ul style="list-style-type: none"> <li>• Phone</li> <li>• Completion of Notifiable Incident Report Form</li> </ul>

### Key Regulator Responsibilities

Regulator	Role for outbreak management
<b>Public Health</b>	<ul style="list-style-type: none"> <li>• Notifies CET when a confirmed case is associated with a workplace.</li> <li>• Leads the COVID-19 case management response.</li> <li>• Provides specific infection prevention and control advice for the case management response.</li> <li>• Leads contact tracing (identifying persons in close contact with the confirmed case during their infectious period).</li> <li>• Activates and leads the outbreak management coordination team.</li> <li>• Determines when the outbreak is over.</li> </ul>
<b>WorkSafe Tasmania</b>	<ul style="list-style-type: none"> <li>• Advises of safe work practices, including the potential need to close a workplace from a workplace safety perspective.</li> </ul>

## Appendix C - Cleaning and Disinfection

For instructions for cleaning and disinfection generally, refer to [COVID-19 Information for workplaces – cleaning](#) (Safe Work Australia) and [Information about routine environmental cleaning and disinfection in the community](#) (Australian Government Department of Health).

Cleaning and disinfection for non-health care settings follows the same principles as routine cleaning and disinfection, except:

- Cleaning staff should wear disposable gloves, a long-sleeved gown and a surgical mask plus eye protection or a face shield while cleaning and disinfecting.
- Cleaners should be trained in putting on and removing personal protective equipment (PPE).
- Areas may need to be prepared to ensure proper cleaning and disinfection (e.g. removing personal effects).
- Soft or porous surfaces may need additional attention (e.g. steam-cleaning or laundering of fabric).

## Appendix D - Response Preparations

<b>Responsible</b>	<b>Action</b>
People Services	Resolve staffing administration – clarify leave provisions.
Directorate – Marketing and Communications	Prepare scripts e.g. social media, web page and intranet posts; school letter scripts, advice for staff regarding school closures.
Risk, WHS & Compliance	Planning and preparedness for school closure under direction from Public Health.
Leadership Team	Continuity Planning: <ul style="list-style-type: none"><li>• Identify key personnel and processes that are critical for CET functioning.</li><li>• Identify possible teams to manage critical processes.</li><li>• Identify current CET priorities that can be deferred if COVID-19 impacts escalate.</li></ul>
Principals	Review cleaning contracts in anticipation of needing to undertake cleaning following positive COVID-19 case <ul style="list-style-type: none"><li>• What do existing contracts provide for – are variations needed.</li><li>• Facilities may be able to assist with information about additional contract cleaners.</li></ul>
Corporate Services	<ul style="list-style-type: none"><li>• Clarify cost impacts.</li></ul>
Risk, WHS & Compliance	Liaise with Public Health on: <ul style="list-style-type: none"><li>• Immediate action on receipt of positive result e.g. should affected groups be moved etc.</li><li>• Immediacy for school closures – noting duty of care.</li><li>• Cleaning at sites<ul style="list-style-type: none"><li>- What is required – what to clean, cleaning method or agents/supplies.</li><li>- Public Health inspection after cleaning.</li><li>- Can the site be used again for other than scheduled services e.g. can teachers who are not home isolated go to the school to do work/collect resources etc.</li></ul></li><li>• Can staff who work at multiple sites, once cleared of home isolation requirements i.e. not needed, be able to continue working at other schools.</li><li>• Will evidence of medical clearance be provided for completed tests, completed home isolation periods.</li></ul>
ICT with support from Learning and Teaching	<ul style="list-style-type: none"><li>• Develop options and priorities for on-line delivery of learning programs</li></ul>
